

Silvassa Through My Eyes □ □

Our recent Silvassa Industrial Visit was indeed a delightful experience. It was a perfect blend of learning and fun along with making great memories. □

Our visit to Dabur Industries enlightened us about the production process of various products.

Being exposed to such a vast platform where so many workers work in harmony gave us an insight into what goes into the making of the products that we use regularly in our day to day lives. Similarly, my visit to Filatex was absolutely fascinating as I saw the process of making polyester thread really close up. For an MBA student, such visits are very helpful as theory learned in class becomes much more meaningful when we see it practically.

But that's not all! Silvassa also proved to be a treat for me as I enjoyed the lovely surroundings with greenery and fresh air. The wonderful food along with good friends made this trip worthwhile for me. Having fun and capturing memorable moments always remains the best experience regardless of any place. I explored a lot and clicked numerous pictures during this trip. It was all about fun and adventure for me.

And for me too, this trip was all about exploring things beyond the classroom and having the best time of my life! □

> It was indeed a great feeling for me to go on this trip to Silvassa. Not only did I get to learn so many new things, I also had loads of fun! □

Silvassa, an amazing place where learning, went hand in hand with fun for me on this college trip! ✨
